EXPERIENCE & PROJECTS

Associate-Project
Cognizant   12/2021 - Present, Noida

- Worked on **AXIS D2C SFRD Project**, A saving investment product developed by *Max life Insurance* which is customized for Axis Bank's mobile application.
- Worked as **Frontend lead Developer** in this project, providing guidance and collaboration within the team.
- Managed requirements, performed PR reviews, and **played a critical role in ensuring seamless production releases** working on tools like GitLab, Jenkins, AWS etc.
- **Reduced their Next.js application build time by up to 30%** by utilizing asynchronous API calls and analyzing non-dependent calls.
- Worked on the **YBL SWAG Project**, aiming to develop a customized savings and investment journey for the SWAG product launched by Max Life Insurance in collaboration with Yes Bank Limited. The project aligns with the latest RBI guidelines for user authentication.
- Worked as a **Senior Frontend Developer**, developed a scalable React component called **"Unified Payment,"** which **increase payment success rate upto 90% from 60-70%** facilitating effortless online transactions. Enabled various **payment methods such as wallets, credit/debit cards, UPI, Net Banking, and Scan & Pay** through integration with key **payment gateways like Paytm, BillDesk, and TechProcess**.

Software Engineer
Thinksys Software Pvt. Ltd.   06/2019 - 12/2021 Noida

- **Gefen Project,** is a comprehensive solution empowering enterprise agents, brokers, and advisors to create meaningful and valuable digital interactions seamlessly across diverse channels.
- Worked as **Full-stack Developer in MERN** tech, handled requirement analysis, built reusable React components, and **crafted UI interfaces with React Material UI** while conducting thorough PR reviews.
- Optimized dashboard **loading time by 25%** with the help of React Memoisation.

Software Intern
OpexAI Business Consulting Ltd.   09/2018 - 11/2018 Remote

- **Analytics Leaders' Summit:** The Analytics Leaders' Summit is a curated event series dedicated to tackling today's crucial challenges in analytics. Explore real-life studies from top-tier brands in this insightful avenue.
- Developed **a multi-page website** using HTML5, CSS3, and JavaScript technologies.
- **OpexAI** is a project which sought a modern, future-oriented website re-vamp for enhanced user experience across desktop and mobile devices.
- Took ownership of the blog page on the website and **revamped it for mobile** friendly users.
